Support and Advice for Sustainable and Durable Print

No shrink, no crease, no edge curl, no residue:Â easily peelable, repositionable and re-useable as many times as you like without ever damaging or affecting the surface or need to repair or repaint walls ever again! And it's a woven fabric that is recyclable.

To do this is dedication and perfection no other media is able to do without an element of risk. So it cannot really be price compared with any other product.

Transform Your Surfaces Instantly & Sustainably with Landor Phototex self adhesive fabric

Whether you use or require your visual communications indoor, outdoor, long term, short term, you will be sure to benefit from the many advantages of our sustainable and durable Print solution and application/project support services.

Not just sustainable and aesthetic materials, but also eco friendly answers to your own buildings and infrastructure.

We make it easy to install, remove, restore , or replace your visual communications, art and graphics. As well as protecting them from unexpected damage or premature UV fade over time. You can also benefit from the ability to retain for re-use or recycle your assets when your campaign or project reaches its end of life.

Phototex Self adhesive Fabric is both durable and stable and long lasting. LEED certified, (eco Build), ACT Child safe Certified (Lead free & Phthalate free) and Fire Certified EN 13501-1

For even long lasting durability and sustainability Landor Liquid Lamination provides that extra essential protection including options for **Landor Anti-Microbial** and **Landor Anti Graffiti** Protection

Latest News, Blogs and Case Studies

The Phototex Self-Adhesive Fabric Advantage

Landor can help you transform your spaces quickly and cost-effectively because Phototex will **save you as much as 75% of the installation time and associated costs**. Once installed, it is even easier to remove and change, particularly compared with most other self-adhesive vinyl, films, and paste the wall products. Removal costs, materials, time, labour and especially disruption can be costly. With Phototex, this simply is not necessary! (remove and replace!)[^]

Phototex is easy to reposition or move time and again and it is guaranteed to never damage your wall or surface or leave any residue when it's removed. Its adhesive is designed to do just that.[^] Phototex is an installer's dream. It can be removed and repositioned hundreds of times without any weakening or degradation of the adhesive strength. In fact you can preserve it, or take it back and install it again – or you just recycle it![^]

Not only is Phototex a no-residue, repositionable and removable fabric – it can also be reused many times for as long as you have new locations to install it. It is easy to roll up and transport because the unique Phototex adhesive does not damage the printed ink surface either.[^]

Once you have finished with Phototex and removed it – you can also simply recycle it. It is a truly **sustainable and versatile**[^] media.[^] Phototex is loved the world over. That's why it is the number 1 selling and and most trusted self-adhesive fabric.[^] [^]

The Landor Print & Projects Consultancy

The Landor Print & Projects Consultancy specializes in offering expert guidance, product management, and project coordination for professionals in visual communication, art, and creative fields.

Our solutions are centred on eco friendly, durable and stable materials that are both long lasting but also versatile, aesthetic and rewarding for the creative and innovative work of the visual communications and creative markets.

For years, PVC adhesives and plastic print protection materials have been prevalent in the printing industry, offering a cost-effective alternative to traditional substrates known for their respectability and aesthetic appeal.

Over the same period we have brought to the industry eco-friendly, Durable, sustainable, long lasting and aesthetic imaging products and solutions to the creative industries.

Our solutions protect and enhance. Your walls are always protected from damage when using Phototex self adhesive fabric, and your inks are also protected when using our liquid lamination coatings. And people are always protected when using our anti microbial protective coatings.

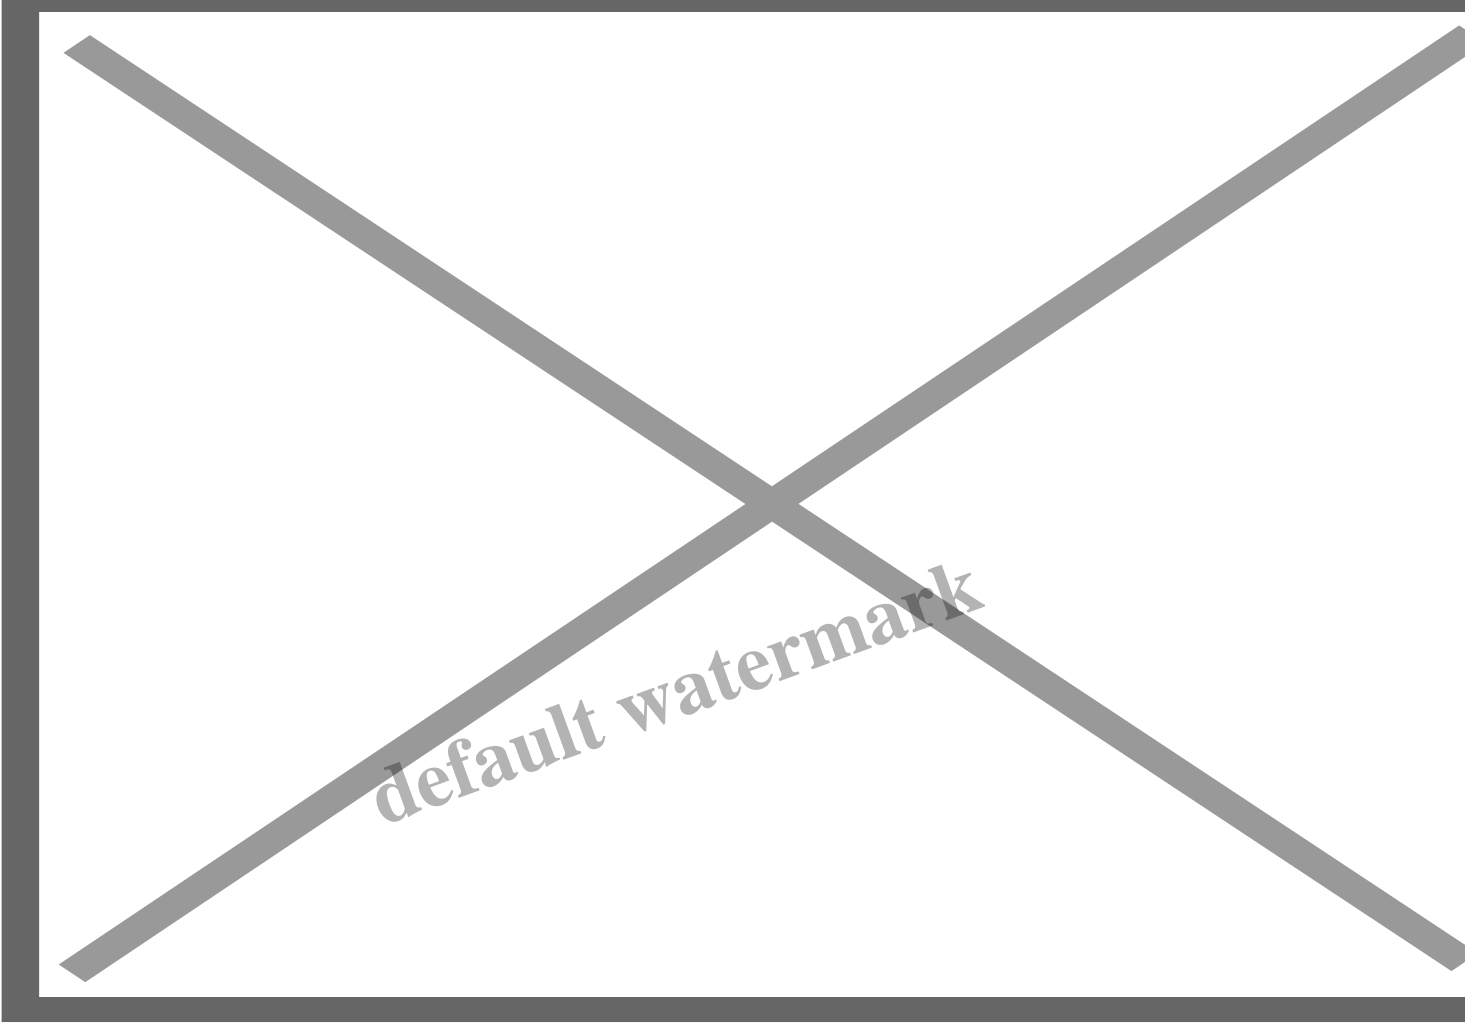

We bring all of this together in our Print and coating partnerships. No matter where you happen to be in the country or the world we have a partner who can meet and exceed your expectations. Stronger together we make sure your expectations are met
